

# Mission statement of the Basel Epidemiology Seminar

**(16 December 2016)**

The mission of the Basel Epidemiology Seminar (BES) is to facilitate communication among those engaged in epidemiological research and education in the Basel region, and to promote the development and use of epidemiological methods in health research. This is done by organizing joint seminars which serve as a forum for independent scientific exchange on current topics in epidemiology and for discussion of work in progress.

BES is an independent, non-profit forum for discussions between epidemiologists working in the academic, industry or regulatory setting of how to apply epidemiological methods in biological and medical science.

---

**If you are interested in presenting a topic at BES, please contact [sigrid.behr@novartis.com](mailto:sigrid.behr@novartis.com)**
